I personally do not have too much demand on the picture, the law-abiding and able to see the OK, such as NFS this slightly higher than expected value of the situation, I was satisfied, but I can be sure that more demanding players will certainly pursue a more superb vision Experience. In my mind, better than NFS racing game is not without. Gaming details in place, shiny real car body can clearly reflect the surrounding scene. During the game, the vehicle can be damaged. When the vehicle is damaged, the screen will be extremely detailed. Extremely rich game scene, from the city, parks, mountains, factories ranging from the beach, beautiful scenery realistic, detailed texture in place. Details are rich around the road, but sometimes it is difficult to tell the isolation zone at fast speeds. The biggest picture of progress for this performance than the light and shadow effects, which sparks when the vehicle bursts into the excellent effect, it can be spurious. When drove out of the tunnel, you can see the dazzling sunlight, through the shelter will have a real-time reflection of light effects. Rain effect is delicate, and has a reflection effect. At the same time the game there are many details of the screen, such as the weather changes, splashing when driving to different pavement, through the flowers when the tree can see the falling petals, and crashing over the street mailbox chaos newspaper and many more. There are no anti-aliasing options in the game's settings, but the overall picture's jagged effect is not noticeable. Although it is a car entertainment game, but the production team did not shuffle in the sound of the game. Each car has a unique engine sound, at the same time according to the different degree of throttle engine sound also has completely different changes, such as the throttle half-step engine sound is more stable, release the throttle idling, full force when the roar and many more. When the sound of the collision car more prominent, whether it hit the street lights or hit a row of iron fence, will reflect a very realistic sound effects. When the police wanted to hunt, will join the dialogue between the police, but also will reveal some important information, such as the hunt for the vehicle model and color, etc., even if you suddenly painted for a color police will also follow the vehicle color is updated and many more. The game is simple, needless to say, of course, in order to best seek a better experience, I recommend the use of the handle for the game. Game support for the handle is better, in different environments have different vibration feedback, you can on the other hand remind the player now the situation of the vehicle. For a racing game, the feel of the game is extremely important for the operation of the vehicle feel in a more ambiguous positioning. Vehicle control is more flexible, the body of the feedback effect is more heavy head, when using the brakes can make a simple bend elegant action, and hand brake elegant effect is not obvious and easy to make the body skew. The handling of the vehicle becomes extremely poor at a very fast speed, almost totally out of control. However, after a little adaptation, but also on the kind of high speed for a long time skidding put it down. AI design in the game is extremely aggressive, whether it is in any game, computer opponents will be fierce top players fierce asshole, squeezed out of the plug to install the thin cricket is even more commonplace. At the same time because the game itself set the police chase situation, so most of the game will be inserted into the spoiler. Police car design is also aggressive, if you want to smoothly reach the finish line, or is the fastest courier come out on top, or is hiding obediently at the end, but this is not easy, most of the game you want to get First, in addition to understanding the track, luck takes up a large part. A game repeated several times presumably is that part of the way players do not like, but unfortunately, you want to get those modified car parts, most of the conditions must be won first place. When the player's vehicle hits NPC vehicles, police cars, roadblocks, walls, anything that should not be hit, the game will give a close-up of the car accident, after which the player's vehicle is placed in the car, regardless of race conditions Reset the player's car (during the race). The events in the game are more or less the same as running in circles and teasing the police. The track design of the game is marked directly in the city checkpoint, there is not much restriction between checkpoints, most of the roads are very wide, and sometimes accidentally open the wrong way. Seventy-eight cars race common sense, refreshing full! The molesting police and the former is somewhat similar, is still running around to evade chase to reduce the wanted, this for the cancellation of hiding point, and can use the modified vehicle appearance checkpoint to reduce the wanted level while cooling. It is noteworthy that, because of the added hardness of the vehicle design, sometimes, or most of the time, the average vehicle rushed toward the road block by the police car rushed results are car crash.-apkawaRd.coM Players only need continuous competitions or constant teasing of the police molesting the police to get the opportunity to compete with those ten enemies. Before that, the live-action animated film that was amazing for that year completely disappeared. Instead, the game was played immediately before each game Called an art fancock full but it does not know what the meaning of the animation, and each game has. Overall, this is still quite good quality.But if you are a racing game lover, this is still you really must not miss the real masterpiece, get on the driver's seat, hold the steering wheel, feel the roar of the motor Drag racing it.
